## Obituary

Francis Drummond was born in the Year 1860 at Carlton Place, Ontario. At the age of eighteen he moved to Mitchell. In 1877 he married Elizabeth Zeng of Pool, Ontario where they made their home in Restock, taking over the care of his father's farm. A few years later they moved to Millerton where he farmed until 1907. During this time six children were born to them, one of them dying at an early age. In 1907 they left their home in the east to take up pioneer life in the west, settling in the Altona District. Here they made their home. They and their family were willing helpers in building up the new community, taking their full share of obligations. Up to the last few years when ill health prevented they were regular attenders of the little community church. Mr. Drummond being an elder of the church for a number of years.

In 1920 they suffered the sad bereavement of their eldest son, Alex, who had made his home in Calgary. They celebrated their golden wedding in the year of 1907. Mrs. Drummond was the first called to her well earned rest in Oct. 1932. From then on Mr. Drummond's health sadly failed gradually growing frailer as the months went by. Two weeks ago he took to his bed sinking into a state of coma from which he never recovered, passing quietly away Thursday evening, August 16th.

The Altona district has lost a very fine member in Mr. Drummond, as he was highly esteemed by all who knew him. Their home was always a place of kindly welcome to everyone. The deceased leaves four sons, three married, William in the United States, Harvey of Vancouver, Elmer of Hill and Edmund on the home farm at Altona.

## Good Deeds W. I.

The Good Deeds branch of the A. W. I. met at the home of Mrs. B. McDonald on Thursday, August 16th, where they enjoyed a very delightful afternoon. After the business meeting and a short talk and paper by the constituency conveners who was paying an official visit, several contests were indulged in which were conducted by Mrs. A. J. Kennedy. An unique one was a motion spelling match which was won by Mrs. Irwin. A conundrum contest was won by Mrs. Clarke and Mrs. Crowder and a drawing contest by Mrs. Heslip. The hostess, assisted by Mesdames Gairbraith and Lilly served a most delectable lunch. There were twenty-five members and visitors present.

## G. Bouzyan Again To Play at Banff

Taking a commanding lead on the Vulcan course with a 73, and playing steady golf at Staveland Sunday with a 68 for a total of 141, Glen Bouzyan of Staveland warns the right to play at Banff in the district tournament sponsored by the Banff Springs Golf Club, and there is no doubt that Glen will make a good showing there. He will be the guest of the Banff Springs hotel for three days. Bouzyan's closest rival was R. Green of Vulcan, playing a 78 on that course and playing excellent golf at Staveland for a par of 66, and a total of 144.—Herald.

Among patients having their tonsils removed at the Vulcan hospital Tuesday and Wednesday of last week were the Misses Augusta, Gretchen and Dana McNaughton, Dorothy Hummel, Ruth Jopling and Gloria Gatenby. Dr. Freese was the attending physician.

## Local & General

Mr. and Mrs. Moffatt were Lethbridge visitors last week. Mrs. J. N. Beaulier is making satisfactory progress, following her recent accident.

Field Tomatoes, Cukes, New Cabbage, Carrots, Beets and Cauliflower at Campbell's.

Mrs. B. McDonald entertained the Good Deeds W. I. at her home last Thursday.

G. Stoddard of Calgary was a business visitor in town this week.

"Sign Of The Cross", you will never forget it. Coming Wednesday, August 23rd.

E. F. Crawford of Calgary is in the district looking after farming interests.

Pail of Silver Leaf Lard and a slab of bacon for \$1.35 at Campbell's.

Lost—Hydraulic jack, east of Champion,— Finder please return to Chronicle office.

Work Shoes that will stand the wear and tear for many a day. \$2.95 a pair at Campbell's.

J. Hagerman is in Calgary at the home of his parents, where he is confined to his bed with an injured limb.

Mrs. C. Boner, who underwent an operation in the Vulcan hospital Tuesday of last week, is convalescing at the home of Mrs. F. Clever.

R. I. Baker was in town this week. While in town he made arrangements to rent the Broadford house, which is now occupied by G. Stewart and family.

R. Tyler is improving his home by putting in a cement basement and large cistern. A. Rinaldi is in charge.

Mr. and Mrs. Art Anderson of Calgary left recently for a three weeks holiday in the Cariboo Country.

M. P. Diemert of Vancouver arrived in town this week and will remain until harvesting operations on his farm are complete.

Dr. and Mrs. Heal returned the first of the week from a three weeks holiday spent in the vicinity of Waterton Lakes and points in B. C.

Mr. and Mrs. J. S. Collins and family arrived home last week from an extended holiday spent at Waterton Lakes and points in the United States.

Something to single out the silver thread of fun, from the grey web of toilsome living See "A Bedtime Story" at your local theatre Saturday night.

J. J. Kidder of Manchester, Iowa will preach at Fireguard school on Sunday at 11:00 a.m. and at Altona at 3:00 p.m.

Mrs. Harry Higgins is seriously ill at her home here. Mr. and Mrs. Gordon Higgins, who were recently married were called from Banff to be with her.

J. G. Daugherty of Des Moines Washington, near Seattle, has returned to the district to look after his farming interests. Mr. Daugherty motored as far as Kingsway and came on to Champion by train.

New readers will be introduced in the public schools as soon as financial conditions permit. Present readers have been in use for 15 years.

K. R. McLean, R.O., of McLean & Anderson, Sight Specialist of 224-8th Ave West, Calgary, will make his monthly visit to Champion, Friday, Sept. 1st, at the Drug Store.

# Broomhall Declares Canadian Wheat Will Always Be At A Premium In Markets Of World

Canada's wheat still stood supreme as the world's grain and confidence came to a close at Regina. Pocketing the biggest winnings of the \$100,000 in cash prize, the Dominion's farmers saw their banner at the top of the mast, with hopes rising that demand for Canadian wheat from foreign countries would outdo the 1933 crop year. Experts who attended that conference gave farmers encouragement in disclosing European countries wanted the Canadian grain.

The big share of the prize money from all grains went to the Dominion. Its growers took \$46,773, more than double the \$23,526 which went to United States growers and \$8,221 won by farmers in countries other than Canada and the United States. Approximately \$2,000 of the prize money was not awarded because judges felt some entries were not worthy.

A chryseur of Canadian wheat of approximately 200,000,000 bushels, as the cereal year ended July 31, compared with 12,962,961 bushels at the same date at the close of the previous cereal year, was a problem for farmers to ponder in view of their tiny wheat.

But the Canadian growers were given assurance it was not the lack of quality in their product that kept it from being purchased in still larger quantities on international wheat markets. In a paper to the conference, Britain's noted market expert, Broomhall, declared it was protection by foreign countries which caused the difficulties.

All millers, Broomhall disclosed, did not and could not use Canadian wheat because of high duties and milling restrictions of importing countries. Millers worried about wheat, and the conference was told, Canadian wheat will always be at a premium in the markets of the world. The message was echoed by other experts.

Led by the newly crowned wheat king, Preland Wilford, of Staveland, and the noted northern grower, Herman Treble, of Wembley, Alberta, captured the greatest share of the prize money going to Canadians. Alberta's wheat was \$25,152, almost equal to the total amount won by United States farmers.

Saskatchewan was second in the list, earning \$12,333, with British Columbia, third, earning \$11,427; Ontario, \$7,393; Manitoba, \$5,003; but the balance was spread between Quebec, New Brunswick, Prince Edward Island and Nova Scotia. Earnings of countries other than Canada and the United States were: Australia, \$6,746; Spain, \$741; British Guiana, \$200; New Zealand, \$101; Ireland, \$150; England, \$91; Scotland, \$49; Southern Rhodesia, \$40; Italy, \$24.

The curtain rang down on the greatest grain show ever held in the Dominion, while proposals for a law pressed to establish a permanent branch of the Federal Department of Agriculture to assure similar events at future times. Another voice showed for the Dominion, probably somewhere in the eastern provinces, is being suggested for 1938.

## Fisheries Production Had a Market Value Of Nearly \$26,000,000 Last Year

Canada's fisheries production in the calendar year 1932, as shown by statistics prepared for publication by the Dominion Department of Fisheries and the Dominion Bureau of Statistics jointly, had a market value of nearly \$26,000,000—to be exact, \$25,697,132. Of this total, \$21,763,111 came from sea fisheries production and \$4,194,022 from the inland or freshwater fisheries.

The year's aggregate was \$4,660,173 less than the 1931 total, and the falling off is explained, of course, by the disturbed world economy and conditions which prevailed. Fish were as plentiful as ever in Canada's vast extent of fishing waters but marketing was difficult and prices low. The Dominion's fisheries figures will show again as normal world conditions return.

Fisheries production value showed a decrease in each of the provinces and in the Yukon Territory in 1932, although in Alberta there was a drop of only a couple of hundred dollars and the Manitoba decrease was relatively small. By provinces, the market value was as follows:

|                      |             |
|----------------------|-------------|
| British Columbia     | \$9,800,118 |
| Nova Scotia          | 6,557,943   |
| New Brunswick        | 2,912,706   |
| Ontario              | 2,147,090   |
| Quebec               | 1,815,544   |
| Manitoba             | 1,291,262   |
| Prince Edward Island | 988,919     |
| Saskatchewan         | 186,174     |
| Alberta              | 100,000     |
| Yukon Territory      | 20,000      |

W. N. O. 2007

## Cheaper Than Detective

Berlin Police Furnish Personal Information For Twelve Cents

It costs only 12 cents to find out all about the lives of a person.

Whereas lovers avails (or more often ambitious dowry-chasers) in France have to hire private detectives or bribe jailbirds in order to ascertain whether she is single, married, divorced, 21, or 48, rich or poor—the obliging Berlin police, under new regulations, furnish all the information for 50 pennings.

Being German police, and therefore the above-mentioned data, they keep tabs on everybody. And being police, and therefore proverbially unselfish, they will not only divulge the above-mentioned data, but come through with her religion, birthplace, and maiden name.

The lady, if she wants to get even can do the same. She may obtain, for the same fee, the gentleman's full name, profession, parents' names, and previous residence. If he has real property, she is entitled to know that, too.

To prove that sophisticated Berliners are just as inquisitive as Americans, look for even a second in this day of high speed driving. If the motorist is driving at thirty miles an hour, his car is going at the rate of forty-four feet each second. If another car is coming toward him at the same speed the cars are approaching at the rate of eighty-eight feet per second.

## Keep Eyes On Road

Dangerous For Motorist To Relax Vigilance Even For Second

It is dangerous to take the eyes off the road for even a second in this day of high speed driving. If the motorist is driving at thirty miles an hour, his car is going at the rate of forty-four feet each second. If another car is coming toward him at the same speed the cars are approaching at the rate of eighty-eight feet per second.

When travelling at sixty miles an hour and approaching another car going at the same speed in the opposite direction, the two cars are coming together at the rate of 176 feet in one second. It is easy to see that in circumstances such as these it is not safe to have to look for more than a fraction of a second at the speedometer, oil gauge or any other dash device.

## Literacy In Canada

Slightly More Than Two Men In Canada Can Read and Write

Women have a higher degree of literacy in Canada than men. It was shown in the 1931 Dominion census. The survey showed that 95.7 per cent. of Canada's male population above the age of 10 could read and write and 96.3 per cent. of females. Ontario had the highest percentage of literacy of any of the provinces, 97.4 per cent., followed by Prince Edward Island with 96.5 per cent. New Brunswick had the lowest percentage, 92.38. The percentages for the other provinces were: Nova Scotia, 95.05; Quebec, 94.5; Manitoba, 95.1; Saskatchewan, 95.3; Alberta, 96.1; and British Columbia 95.7.

Twenty-three weather stations have been abandoned without any improvement that we can notice. Shanghai's latest skyscraper, which has 22 stories, will be occupied by a bank and an apartment hotel. Trinidad's famous lake of natural asphalt is 114 acres in extent.

## Professor Met His Match

Quick-Witted Student Found Fault In His Deduction

The professor thought he was clever, but one day he met his match. "Arithmetic," he commenced his lecture, "is the science of truth. Figure cannot lie. For instance, if one man can build a house in twelve days, twelve men can build it in one day. Yes," he said, "then 288 men can build it in one hour, 17,280 in one minute, and 1,036,800 in one second. I'm sure one of them couldn't lay a brick in that time."

While the class and the professor were still gazing the student went on: "Again, if one ship can cross the Atlantic in six days, six ships can cross it in one day. That's not possible, either."

## Production Of Foot Wear

June Output Was the Largest Since 1929

The June production of leather footwear in Canada at 1,965,474 pairs, was the largest output recorded for any month since January, 1929, a Dominion Bureau of Statistics report says. That figure represents an increase of 211,083 pairs of 12 per cent. over the preceding month and an increase of 498,456 pairs or 26 per cent. for the corresponding period last year.

Exports of leather footwear in June last amounted to 2,081 pairs, an increase over the preceding month of 1,659 pairs and an increase of 776 pairs over June, 1932.

Oliver oil produced in Spain this year is expected to weigh 400,000 tons, the largest in years.

Canada's export market for raw materials in Japan is gradually increasing.

In far northern Siberia the ice does not break up in the rivers until June.

## SPORTS TAILORED JUMPER DRESS IN DUAL MOPE

It is a very bad crinkly crepe silk with a fresh white tubular crepe silk gimp.

The leather belt is coral-red. The blue bone buttons have coral-red rims. There is still another touch of red at the neckline in the pert crepe silk.

It's so girlish and smart. It could also be worn with a white organdy gimp.

A coral-red crepe silk printed gimp with long sleeves offers still another disguise.

Style No. 709 is designed in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust. Size 16 requires 2 1/2 yards 35-inch for dress, with 2 yards 35-inch for blouse.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

James Mollison, trans-Atlantic flyer, telephoned to friends in London that he and his wife, Amy, after returning to England by steamship, planned to fly to the United States again, and then carry out their aim to fly as far as possible eastward, hoping to better the long distance flight record. It was expected the flight would be made next year.

## BRITISH DRIVER HOPES TO SET NEW RECORD

On the track Mr. John Cobb lapped the hour at more than 150 miles an hour.

Our picture shows Mr. J. Cobb standing in front of his new Napier Ballion car, in which he hopes to maintain an average speed of 150 miles an hour for twenty-four hours at the Brooklands Track, London. During tests on the track Mr. John Cobb lapped the hour at more than 150 miles an hour.

# Elaborates General Plan For British Community Settlements Under Migration Scheme

## Wooden Relic Found Embedded In Rock Age Is Set At 10,000 Years

Harold Putnam, stipendiary magistrate for Truro, Nova Scotia, has a relic which he believes may recall the days of a million years or more ago. Going to the Salmon River for a flat stone, Robert Fielding found on a suitable for a step to Mr. Putnam's garage. On close examination it was found that embedded in the rock was a petrified stick of wood that the wood has been treated by human hands the exhibit gives every indication.

Judging by the rock, which is said to have been brought from Wallace for a railway bridge at Truro, the age is set at a million years or more and for the wood to become embedded in it showed that the stick is at least a million years old. Around Great Village are many fossils showing the movements of animals of the age group, but the exhibit which Mr. Putnam guards very closely is believed will show the methods and modes of prehistoric humans.

Graves at equal spaces apart that might have been made by man or machine are discernable and a sort of corrugation lengthwise, the stick was found to be evidence that the wood was used for some implement or weapon. A stone cutter will be engaged to cut away a portion of the rock so that more of the petrified stick might be seen.

The stick is at least three inches in diameter and more than ten inches long. The ends are not exposed and it might prove that it was a weapon or a tool of some kind used in the prehistoric ages.

## Brighter Prospects

Improvement In Business Conditions Sighted In Bank Letter

Momentum attained by business during the second quarter of 1933 has carried several industries to higher levels though July states the Canadian commercial letter of the Canadian Bank of Commerce.

"It may therefore be expected that complete reports for the past month will show the volume of business as a whole to have been maintained at about the June level.

In view of the serious crop damage, the breakdown of the World Economic Conference and recent stock market losses, this stability should be regarded as the best showing possible," the letter continues.

The 1933-34 "wheat year" opens now with a short new carry-over certainty, the letter continues, but the abnormally large carry-over of old wheat, some 200,000,000 bushels will make up for the shortage of the new crop and "Canada will therefore have for the coming wheat year a normal supply and an exportable surplus practically equal to the surplus recorded for the 1932-33 years."

## Opposed To Replacement

His car had taken fire and was destroyed. It being insured he went to the insurance office and demanded his money. He was given a check to fill up, and was told he would not get the money, but that the car would be replaced.

"Oh," said he, "if that's the way you do business give me back the premium I paid the other day on my wife's policy."

## Soviet Harvesting Impeded

Machinery Repairs Lack and Fuel Deliveries Are Behind

Somewhat dismal is Pravda's summary of the news from Russia's southern grain front. It is unpleasantly reminiscent of last summer's harvesting reports.

Harvesting machines are reported to be plentiful, but the necessary repair breakdowns and availability for use only a small part of the time. Oil and gasoline deliveries have failed and there are shortages of parts, tools and skilled mechanics.

Some grain has been reaped; grain, fully ripe, has been left to rot to seed. Famine is feared and the full after reaping is frequently noted and there is often a great disproportion between the average reaped and the quantity threshed. The "tempo" of the harvesting is slow and almost all regions are badly behind in their progress. Against all that, reports from everywhere indicate the crop is splendid.

## One Of Hitler's Mistakes

Herz Hitler's worst mistake is that he has systematically crushed all neighboring feeling on the part of Germans towards Jew-factions, and that he has systematically tried to raise all the military sentiment of a people susceptible to militarist suggestion. There are few worse crimes than that of systematically trying to raise all the military sentiment of a people susceptible to militarist suggestion. There are few worse crimes than that of systematically trying to raise all the military sentiment of a people susceptible to militarist suggestion.

## Lessons Of The World Grain Show.

The great World Grain Exhibition and Conference has become a matter of history, but to the thousands of visitors who were privileged to view its wonderful display it will long be remembered as one of their most delightful and instructive experiences. Western Canadians, in particular, who had never had the opportunity of visiting the other provinces of their own Dominion must have been deeply impressed with the variety, magnitude and richness of the resources of their country, and to have obtained through the various provincial exhibits a renewed confidence in the future of Canada.

A tour of the British Columbia exhibit could not fail to have impressed one with the amazing wealth of resources in that great province. Divided into three sections, the exhibit depicted first the forest and mineral wealth of the Pacific Coast province, then the magnificent fruit products, with their attractive orchard scenes, and finally the fisheries whose products are known and in demand the world over.

Or, jumping over the prairie provinces and into Ontario, the visitor found not an amazing display of manufactured products from that great industrial province, but a display of the wealth which is being produced from the mines of the province as indicated by the thousands of dollars' worth of minerals on display. They learned how Ontario was proceeding with a vigorous reforestation policy to maintain its forest wealth, how forest fires are fought, and other steps taken to conserve this great natural resource.

Studying the Quebec exhibit, depicting the quiet pastoral life of the people away from the industrial centres, one could not fail to get a new understanding of the ancient province, and to realize what a steady influence it is bound to exert upon the national life of the Dominion. The teeming commerce on the night St. Lawrence, its great maritime ports, with the most intensively cultivated farms stretching back to the St. Lawrence banks, all conveyed a picture of beauty, strength and progress, the homes of contented thrifty people.

To visitors from other provinces and countries, the exhibits of the prairie provinces must have been a revelation indeed. Holding the view, as undoubtedly many such visitors did, that these provinces produce nothing but grain and other agricultural products, they certainly had their ideas expanded. Manitoba exhibited its exhibit to a display of the wild bird and animal life of that province, extending from its southern prairie fields to the arctic circle. It was one of the show exhibits of the Exhibition and people stood before it in interested crowds long in admiration.

Alberta demonstrated that it could grow wheat by carrying off the world's wheat championship, but it also let visitors know that 14 per cent. of all the coal supplies in the world were located within its borders, that it produces tens of millions of pounds of best sugar annually, that its lakes and rivers teem with fish, that its timber areas are very large.

And Saskatchewan, popularly known as the "bread basket of the Empire," which in normal years produces more than one-half of all the wheat grown in Canada, and more than any other single province, and in the world, surprised everybody with its wonderful exhibit of huge logs from its timbered regions, its many varieties of fish, and big fish at that which would do credit to a province by the sea, its mineral wealth of coal and clays in the south and richer metals in the north, its wild bird and animal life, its scenic beauty spots.

The usually accepted picture of the prairies as flat, uninteresting fields of grain, and nothing else, was dispelled by these truly wonderful exhibits. Even to the people who were already well versed in the prairie and to unite the whole were the comprehensive exhibits of the Dominion Government revealing in all their richness and variety the magnitude of the resources and products of Canada.

But why recall these things now the Exhibition is over? Because one of the objects of the Exhibition was to bring this knowledge in its most interesting and fascinating and compelling form to the people of Canada and the world. Seeing is believed to be the best teacher, and the prairie and Regina cannot fail to have been impressed and convinced of the development and prosperity which the future has in store for this Dominion, and for every part of it.

And such conviction was reinforced by the people into the past which was also afforded. One had only to stick their head through the window of the old Hudson Bay trading post and examine its contents, or gaze upon the means of transportation in the days of the pioneers—not so very long ago at that—the old Red River, the Redoubt, the Redoubt, and to contrast them with the great Hudson Bay stores at Winnipeg and Calgary, to mention only two, and with the C.P.R. and C.N.R. exhibits and the automobile exhibits of modern means of transportation, to appreciate the fact that Canada has made amazing progress in the short span of its national existence. Such progress offers but a glimpse and a promise of the still greater progress and development that is to be.

Thus in the midst of a depression which has to some extent at least shaken the confidence of many of our people, the World Grain Exhibition came with its wonderful and beautiful story. It also brought a message. It is not a message of despair, but of hope. A message that, trying and difficult as times may temporarily be, they are, after all, only temporary because a nation with such resources, with such culture, with such virile and progressive people, cannot fail to surmount any and all difficulties. Canada is for the moment caught in the meshes of a world of evil events, and conditions beyond our control, but it will win through and rise to greater, grander heights than ever before.

Gum boxes formed an important item of Canadian export to New Zealand during the first three months of the current year.

The word "tax," we are told, comes from the Latin "taxare," meaning "to touch sharply." No further wisecrack is needed.

The world is too small for the man who knows it all.

## Bowel Complaints of Children During the Summer Months

Mothers should look well after their children during the hot summer months. Despite all they can do the children are liable to be seized, at any time, with diarrhea, dysentery, summer complaint, or other forms of bowel trouble.

There is a safe remedy in Dr. Foster's Extract of Wild Strawberry, a remedy that has received the endorsement of the Medical Council of Canada. It has been on the market 80 years and is the most reliable.

Dr. Foster's Extract of Wild Strawberry is manufactured only by The F. M. L. Co., Ltd., Toronto, Ont.

## Judge Fines Himself

Makes Penalty Light Because It Was His Birthday

Under the Chicago system, judges take turns sitting in the various courts, and a recent Monday was Judge Eugene J. Holland's first experience in the traffic division.

Immediately after Holland took charge, the clerk announced the first case as follows:

"City of Chicago vs. Eugene J. Holland."

Judge Holland sat very straight and very soberly.

"What's this?" he asked of the clerk, thinking perhaps that a joke was being played to initiate him into his new environment.

The clerk explained that the case involved a parking charge which was several days old. Holland then recalled that he actually had received a "ticket."

"Well," he said, smiling, "this is my first case in this court. It is also my first case here. This also happens to be my birthday. So I'm going to fine myself a break. I will therefore fine myself \$1 and 1/2 cents."

## Take Tremendous Chances

Aviators Flying Hours Without Rest

Captain James Mollison and his wife, Mrs. Mollison, who are crack fliers, left Pendine, Wales, with the intention of flying something in New York their plane was brought down at Bridgeport, Conn., but far from the excitement, but the thing cracked and Mollison and his wife were sent to the hospital.

In speaking of the accident, Mollison said: "I was so tired I didn't know where I was headed. He had been in the air 29 hours."

Wiley Post, who finished the globe circling trip, said: "I went to sleep at 10 o'clock last night. I had been in the air 29 hours and I was so tired I didn't know where I was headed. He had been in the air 29 hours."

It is probably no law which says that people who go on long flights must sleep. They must take a sleep. Truck traffic has some such regulation, but not so with the fliers. Flying 29 hours is a greater strain than the human mind and body can stand.

The fliers would have been well advised had they come down after crossing the Atlantic and taken another hop to New York. It would not have made much trip and the less successful, and would probably have allowed them to make a perfect three-point landing in New York—Stratford Beacon-Hi-Ed.

## How the Rule Works

National Problem Doubly Eased

When Man Obtains Job

As a national problem, man thrown out of work is only half the mischief done. It means one has to work to carry the burden of one more dependent. Fortunately, the rule works like other ways when it comes to increased employment. A man in a new job means for the whole nation one more worker to carry one less dependent.

Supposing that at the depth of the depression in March we had 12,000,000 persons idle. It would mean that we had 36,000,000 persons at work. We had three people with jobs to carry one without a job. If today employment has increased by 3,500,000 jobs, it means we have 10,500,000 persons at work, against 8,500,000 persons still idle. We have almost one worker to carry one idle person. The social tension is almost cut in two.—New York Times.

## Makes a Difference

No Music in Threshing Machine

When Crops Are Poor

There is not much music in the threshing machine in these hopeless years. Its engine has a monotonous chug. The grain that pours out of its spout is small in quantity. The straw that pours from it easily finds room for itself in the yard. This lack of a prosperous look makes its dust more oppressive. The soft, tongueless noise about the machines are silent, and the red dust is talking in hoarse, hoarse voices. Poor markets and disappointing crops when they fall together spell the misery of the rural dweller, grain machine.

## Wife's Delight At Husband's Loss

30 Pounds of Fat!

Here is something all wives of fat men will be glad to know. It is the experience of a woman whose husband recently weighed 300 lbs. She writes:—

"I really feel I must write and tell you that, after taking Kruschen salts for nearly 3 months, my husband has lost 30 pounds of fat. He is now 270 lbs. This has been achieved by nothing else but Kruschen. I am too heavy also, and I started taking Kruschen only three weeks ago. Already I have got down from 153 lbs. to 144 lbs. We are delighted."—(Mrs. C.)

Kruschen combats the cause of fat by assisting the internal organs to perform their functions properly—to throw off each day those waste products and poisons which are allowed to accumulate, will be converted by the body's chemistry into fatty tissue.

## Eskimo Slaying

Village Bad Man Killed By Other Members Of The Tribe

Story of the slaying of an Eskimo village "bad man" by other members of the tribe, is told in a wireless report received at Royal Canadian Mounted Police headquarters from Ottawa.

Inspector T. Sanday Vunch, on board the Northern supply steamer "Nascope,"

On-Shoak-Juke, said that about 15 years ago killed a village-aborigine at Cape Dorset, in Baffin Land, met retribution six months ago, when his own life was taken by a trio of Eskimos whom On-Shoak-Juke had been threatening.

The dead native was regarded as insane. He had shot at his wife some time before his own death, and for no apparent reason he had informed his wife that he intended to kill her. The trio forestalled him, and took the law into their own hands. They decided that the tribe would be better off without On-Shoak-Juke, and forthwith shot him.

When Inspector Sanday-Vunch reached Whitehouse, he learned that "Nascope," the tribal chieftain, and all interested parties were produced and an inquiry set on foot. The inspector informed headquarters that a complete report would be mailed when the "Nascope" reached Moosemen on her homeward trip.

## Nothing To Worry Them

Newfoundland Is Lucky To Have Backing Of Mother Country

It may be a bit of a shock to Newfoundlanders to find that for a time they are to have their dominion status virtually taken away from them and the country placed under a commission which will perform all the essential functions of government.

That, at any rate, is the recommendation of Lord Amulree's commission, which came out to Newfoundland to investigate, and it is likely to be adopted.

Newfoundlanders should not worry. Newfoundlanders should be very happy to think that somebody else is going to take over the job of straightening out tangle into which they have gotten themselves. What has happened is simply this. One of John Bull's family has got into a bad mess, and the old man is coming to the rescue. He says often, "I just stand aside for a while until I put you on your feet, and when I see that you are all right I'll step out and you can run your own nose again."

That is one of the advantages of being able to look to a "Mother Country."—St. Thomas Times-Journal.

## Doctor's Hand Valuable

Loss of the use of his right hand in an automobile accident has brought to Dr. Abraham Goldfort, of Cheltenham, England, a verdict of \$50,000 damages. His writ was broken when he was struck by a motor car. Unable to write prescriptions he was forced to take an assistant with him wherever he goes.

## Wheat Exports

July Was a Banner Month For Canadian Flour

Measured in dollars and cents, July, 1933, was a banner month for the Canadian farmers. Canada's wheat exports, valued at \$1,373,500 bushels of wheat in world markets, reaching \$1,302,600, an average of 75 cents a bushel. The average return in July, 1932, was 57 cents a bushel.

In July last year, the export of wheat was valued at \$1,302,600 bushels, but the return of \$11,509,600 was considerably lower, making the average price 75 cents a bushel. In July, 1931, 12,060,800 bushels were exported at an average price of 61 cents a bushel.

About 450,000 different kinds of insects are known and several thousand new ones are discovered each year.

## Britain May Capture

Coveted American Cup

New All-Steel Cutter Revives Hope Of Sportsmen

A beautiful new streamlined racing cutter, winning races after races by spectacular margins, suddenly has revived British hopes of capturing the American cup.

The cup—"that old nag" so persistently pursued by Sir Thomas Lipton for 33 years—probably is more coveted by British sportsmen than any other trophy in the world. Why Britain never has been able to regain it since it crossed the Atlantic in 1851 is a riddle.

But Britishers believe that the answer has been found in "Velshe," ultra-modern all-steel creation of Charles E. Nicholson, who designed the last two Shamrocks for Sir Thomas Lipton. "Velshe" embodies all the lessons Nicholson learned from the defeat of "Shamrock V" by Harold Vanderbilt's "Enterprise" in 1930.

The success of the new cutter has made it almost certain that her owner, W. L. Stephenson, will succeed the picturesque and beloved Sir Thomas as challenger for the cup.

Stephenson, chairman of the British subsidiary of F. W. Woolworth & Co., named the yacht after his three daughters, Yolma, Sheila and Daphne.

No contest could be held this year, since the challenges must be made at least nine months before the race, but British yachtsmen believe Stephenson will issue it in the fall if "Velshe" comes out on winning in the great Scottish regatta festival known as the "Clyde Forthnight," which just ended.

"Velshe" won five first and second prizes out of 11 races in the "Shamrock V" and King George's Britannia. The two "Shamrocks" scored over "Velshe" in the regatta, but they were by margins of only a few seconds while all "Velshe's" victories were decisive.

"Velshe's" chief feature, aside from her steel hull, is the now-famous "Park Avenue" boom, frankly copied from the "Enterprise" with a new ideas added.

Speeds up handling of the material. Moreover, she is equipped with all the other time-saving mechanical devices which Lipton said were responsible for "Enterprise's" victory, in the last cup race.

Almost a sure sign "Velshe" was built to challenge for the cup is the fact that it is 88 feet on the waterline and 127 feet overall. That is longer than "Shamrock V," which felt the need of more length in the rougher American waters.

When the cup course is laid, "Shamrock," moreover, is technically inferior to "Enterprise" in speed to windward. "Velshe" is an improvement on this point.

Otherwise the new cutter adheres pretty much to the international specifications for "J" class yachts, which are slightly more than 80 feet, has a sail area of 7,500 sq. ft., a keel, a mast, a beam of 21 feet and draft of 15 ft. Its lead keel weighs about 10 tons.

"The Other Club"

Distinguished Organization In London Celebrates Twenty-First Birthday

One of the most distinguished dining clubs in the world, known as "The Other Club," has just celebrated its 21st birthday by a dinner at the Savoy Hotel, London, England, among the guests being Sir William Jowitt, former Attorney-General, and Lord Kysant, former President of the Federation of Chambers of Commerce of the British Empire, General Jan Smuts, South African statesman, presided at the coming-of-age party.

The club was founded by Winston Churchill, and the late Lord Birkbeck, which took place once a dinner in a private room at the Savoy during the time that Parliament was in session. It was intended to provide a ground where political opponents might meet. One of the provisions that "nothing in the intercourse of the members shall be allowed to interfere with the full activities of party politics."

Not Good For Business

Wheat At Low Levels Keels World From Prosperity

British millers and corn merchants do not want wheat to remain at a low price, Sir Albert Humphries, representative of Old Country millers, interests told delegates to the World's Grain Conference at Regina.

It is not good for the producer, miller or the people as a whole for wheat to remain at low levels," Sir Albert stated. "It agriculturalists in the wheat sense can be made prosperous, then the whole world will very shortly become more prosperous as well, added.

## SYNOPSIS

Camilla Hoyt, young and beautiful student in an art school, unconsciously sketches the head of a fellow student during class and when she is supposed to be drawing a Grecian urn. The professor, looking at her sketch, embarrasses Camilla by having Peter Anson, the boy whose head she sketched, criticize her work before the class. Afterwards Camilla goes to the park outside to cry. A hand touches her shoulder. It turns out to be Peter, who apologizes for his action and consoles her. He makes a date to see her that evening. "You're a marvelous dancer," Camilla says to him. "Peter takes her to the theatre first and then to the night club where they meet some of Camilla's friends."

(Now go on with the story)

## CHAPTER IV.

Peter danced with Camilla, his arms aching for Camilla. He felt clumsy now, and self-conscious. But Camilla told him gushingly, "You're a marvelous dancer. Mr. Anson. I could dance with you all night."

"I'd never last that long. And I don't like to dance, anyway," he told her bluntly.

"Not even with me?" she pouted.

"Oh, you're all right. It's just that I don't like to dance."

"Then why did you bring Camilla here?"

"Because she wanted to come here. I believe."

"That's just like her. She gets everything she wants."

"I suppose so. But why shouldn't she?" defensively.

"That's what everyone seems to think. But she never thinks of herself about making anyone else happy—any more," Camilla amended.

"Has she changed—recently?"

"She is more changed every time I see her, which isn't often."

"She doesn't play with the crowd like she used to, and she acts most of the time as if she were far away, when she is around."

"Perhaps she's getting serious about life and trying to find some definite work. I met her at a party."

"I know. She's been going for the intellectual stuff in a big way and cutting the rest of us. She is doing right smart, lately," Camilla shrugged.

"Perhaps you just imagine it," Peter defended her.

"Any kind of study takes a lot of one's time and mind. I'm sure she doesn't intend to high-tail you."

"You're pretty crazy about her, aren't you?" Camilla's eyes narrowed.

"Call me crazy if you like," he smiled.

"Well, she will treat you like all the rest. Almost every fellow in our crowd has had his crush on Camilla, and his cure. They all get over it after she has kept them miserable for awhile."

"What nice spring claws our kitten has!" thought Peter, and replied, "That makes it nice for me, because they gave them all the gale, because I might be the exception to the rule after all. His eyes were staring at Camilla."

"Take that slap in the face, now. You asked for it."

"But nothing daunted Camilla. 'Oh, yeah? Well, if she's too crank, bring

your wounds to me and I'll bandage them up for you. I might feel sorry for you because you're a nice boy. Heart wounds are serious."

"Thanks a lot, Miss Harris. You are very kind." She ignored the remark in his voice, and when they danced again, spoke only in gay banter. Peter's eyes followed Camilla's lit grace in Terry's arms, covetously. He grieved the loss of contact with her, the more because he knew he would never dare to take her out again.

The supper order appealed him. Lucky he had brought the extra money. He was in for it, all right. And he might expect the same thing to happen any time he made a date with Camilla. She had scores of wealthy friends whom they would encounter everywhere. And he would be had to be prepared to act as host any time.

Pushing her on the floor, he sang to her with the orchestra, "I've had the last dance for me, sweetheart."

She nodded smiling. The last dance, he thought. Their last, forever, perhaps, and wondered if she would care much if it were.

Terry ordered more drinks when they returned to the table.

"Nothing for me," Camilla declined. As host, Peter felt obliged to join his guests. "Ginger ale," he said, and apologized to Terry. "Eight o'clock closing tomorrow and a headache would go."

"Don't you hate the spring?" drawled Terry, luxuriatingly sipping his high ball.

"Grind!" Terry exclaimed with surprise.

"Mr. Anson is one of those rare people who likes to use his brains," Camilla explained.

She was laughing at him, Peter wondered, and grew miserable. Perhaps Camilla was right. She was beginning already to punish him for his absurd hopes.

The waiter presented two bills, one for the food and one for the drinks. The last autographed Peter, but he paid without a word. He had had his fling and it would last him for awhile. "Let that be a lesson to you," mocked the orchestra leader, who, in a sudden crescendo, it would be, he resolved.

But when he took Camilla into his arms for the last dance, he forgot the orchestra leader, and in a sudden crescendo, it would be, he resolved.

When he took Camilla into his arms for the last dance, he forgot the orchestra leader, and in a sudden crescendo, it would be, he resolved.

When he took Camilla into his arms for the last dance, he forgot the orchestra leader, and in a sudden crescendo, it would be, he resolved.

When he took Camilla into his arms for the last dance, he forgot the orchestra leader, and in a sudden crescendo, it would be, he resolved.

her, and changed her whole world! How strange life was, that years could pass in which nothing of importance ever happened, and then a few hours could suddenly hold so much happiness and beauty!

"But he has never asked to see you again!" her thoughts roared and she was plunged into misery again. It had been sorry for her because of the incident in class that she was taking her out was his chivalrous way of apologizing. Her face burned with remorse at the memory of his finding her in the park in tears. It angered her. She was angry and hurt because she was in love and not at all of being loved. That was why she wanted to hate Peter.

(To Be Continued.)

## Another Tradition Ended

Last Hudson Bay Company Ship Has Sailed From England

Recently the ice-breaker "Nascope" steamed down the Clyde river from Ardrossan, marking the end of a tradition that has lasted 245 years.

In 1688 the city-ton ketch "Nascope" sailed from Gravesend to Hudson Bay with forty-two men, the pioneers of the Hudson Bay Company. It was the last ship to depart, the first Governor, who backed this first venture of the Governor and Company of Adventurers of England Trading into Hudson's Bay and since then ships have sailed from Britain to Canada with stores and provisions and back from Canada to Britain with cargoes of furs.

But the "Nascope" is the last of them, and will never return to British waters.

The last ship to depart, the first Governor, who backed this first venture of the Governor and Company of Adventurers of England Trading into Hudson's Bay and since then ships have sailed from Britain to Canada with stores and provisions and back from Canada to Britain with cargoes of furs.

The last ship to depart, the first Governor, who backed this first venture of the Governor and Company of Adventurers of England Trading into Hudson's Bay and since then ships have sailed from Britain to Canada with stores and provisions and back from Canada to Britain with cargoes of furs.

## When Glamor Is Gone

Many Retired Farmers Find City Life Not So Attractive

A fair amount of the glamor of city life has been brushed aside during the past three or four years.

Many a farmer who retired from the land with what he thought was enough capital to see him through for the rest of his days, has found that investments he may have made with city jobs have realized that many of these farmers are experiencing a pinch which they never knew on the farm. Those who could not supplement their income with city jobs have realized that when depression hits a country a factory job is an uncertain commodity.

So the old farm looks attractive, and experience has shown that its many advantages are merely blessings in disguise.

## War Enemies Never Met

Foch and Hindenburg Disappointed When Plans Were Spotted

Hindenburg and his great antagonist met Foch never met.

Not did the field-marshal-president ever have the opportunity of talking over with Foch, John J. Pershing, Lytton, Fayolle and Franchet d'Espèrey, the other French marshals. Yet like a good professional soldier, he would have liked nothing better.

However, he came within an ace of meeting Foch, for whose character and tactical ability he had the highest regard. It took his elevation to the presidency of the Reich to forestall what would have been an historic encounter.

In the autumn of 1924, Foch told his aide, Major René L'Hopital, that he hoped some day to meet Hindenburg, "not as a French officer and a German, but as a true friend."

Thoroughly, who knows German as thoroughly as he knows English, got busy. Through personal friends in Berlin, he had his chief's desire brought to Hindenburg's ears. The old marshal readily acquiesced.

Then came the problem of how to arrange the meeting. Nationalistic feeling was running high in both France and Germany. Hindenburg's hobnobbing with the hereditary enemy was bound to have caused a storm of protest. Foch's fraternizing with his German counterpart would have made the Third Republic rock.

Hindenburg, always a diplomat, found a way out. Foch was to go down to Strasbourg ostensibly to inspect the view to the place in the early spring of 1925. Then Hindenburg's first annual would be taking the cure in Baden-Baden. Overnight the ex-generalissimo of the Allies would meet over the Kehl bridge, unannounced, with L'Hopital to act as interpreter.

The stage was all set for the interview. Then Hindenburg's fellow countrymen elected him to the presidency. And while a retired German army officer would very well meet a retired French army officer privately, it was naturally out of the question for the president of Germany to receive Marshal Foch under any circumstances.

Foch regretted the missed opportunity until his dying day. "I have the greatest regard for Hindenburg," he frequently told friends, "I consider him a really great man."

Foch regretted the missed opportunity until his dying day. "I have the greatest regard for Hindenburg," he frequently told friends, "I consider him a really great man."

## DROUTH AND HEAT TAKES TOLL OF WESTERN CROP

Ottawa, Ont.—Canadian field crops will range from 10 to 57 per cent. below average this year, the Dominion Bureau of Statistics has today announced. Drouth and heat took heavy toll of the crops, especially in Ontario and the prairie provinces.

The most damage during July was done to crops of flax, wheat, barley and oats, the survey showed. The flax crop, on a greatly reduced acreage, was judged to be 43 per cent. of average at July 31. The condition of the wheat crop was shown to be 67 per cent. of average which with the exception of 1931 was the lowest figure at that date in the records of the bureau.

The coarse grains also suffered from drouth, the Bureau reported, and prospects were for about two-thirds of an average yield. Potatoes were placed at 84 per cent. of average. Considering all crops, the yield prospects for 1933 were among the lowest on record for Canada.

The report said for the fifth successive year, conditions on the prairie grew worse in July. Compared with conditions at the end of June, the decline amounted to over 20 per cent. Manitoba's decline was 19 per cent., Saskatchewan's 30 per cent. and Alberta's 23 per cent. The report said Alberta's yield would be one of the lowest ever in the history of that province.

Dealing with Saskatchewan, the report said: "In every crop district of Saskatchewan, the condition of the spring wheat crop declined during July. During July, damage due to drouth, high temperatures and grasshoppers was greatest in crop districts in the southeast corner, three (along the southern boundary and projecting inland toward the west), six and seven (extending across the west-central portion of the province).

On Alberta the report said: "Judged by conditions at July 31, the average wheat yield for Alberta will be one of the lowest, if not the lowest on record for that province. This is mainly due to lack of rain in southern and east-central districts where the wheat acreage is most concentrated. Less than half an average crop is indicated for districts 1, 2, 4, 5, 6 and 7 (taking in the entire southern half of the province), which have 5,000,000 acres under wheat. Prospects at July 31 were for below-average crops in the remainder of the province.

## Italian Aviator Victim Of Seaplane Accident

Motor Trouble Caused Machine To Overturn During Takeoff

Horta, Azores.—Four Italian aviators, members of General Italo Balbo's seaplane squadron, were hurt when their plane overturned during takeoff for Lisbon, Portugal.

The flyers, Capt. Rattieri, the pilot; Lieut. Squaglia, Sergeant Cremaschi, mechanic, and Sergeant Boveri, radio operator, were taken to a hospital. Lieutenant Squaglia died as the result of congestion of the lungs. Motor trouble caused the seaplane machine to turn over as it was leaving Ponta Delgada, Azores, with 14 others for Portugal and home, after flying thousands of miles from Italy to Chicago and back. In an accident at Amsterdam in the outward journey, one flyer was killed. The ill-fated ship was called the "Italo".

## Summer In North Over

Churchill, Man.—Although mid-summer heat waves are taking their toll south of here, fall winds are already blowing across the wastes north of Churchill. Autumn is fast approaching. This fact is brought home to residents of Churchill by the movements of trappers and birds. The trappers are moving north to their lines. The birds are moving south to the prairies.

## Program Is Completed

Churchill, Man.—The week ending August fifth saw the summer program of the Hudson Bay Railway ballasting and re-conditioning operations practically at an end. During the week the industrial spur running along the Manitoba government townsite, was completed. This spur is about one mile in length.

A bicycle rear light which flashes with the rotation of the rear wheel has been developed in England.

W. N. U. 2007

## New Public School Readers

To Introduce Change For Western Provinces When Conditions Permit

Montreal, Que.—Members of the railroad running trades have set September 15 as one of the most momentous decisions in the history of Canadian railroads. On that day, 24,000 members of the union will be instructed by their general chairman as to the advisability of striking—last legal step in fighting a second 10 per cent. reduction in wages enforced by both the Canadian National and Canadian Pacific Railways.

Ballots were mailed to engineers, conductors, trainmen, telegraphers and engine-men, marking the furthest step taken by any of the railroad unions in their fight against the reduction.

There is no change, it was stated, in the shop trades opposition to both the 10 per cent. reduction effected by the railroads at approximately a year's interval.

## U.S. Grain Code

Proposal For Fair Competition For The Grain Exchanges

Washington.—A proposed code of fair competition for the grain exchanges, submitted to the farm adjustment administration, fixed definite minimum margins to be put up in virtually all speculative branches of grain.

Other portions of the proposed code followed generally rules and regulations established by the grain exchanges in grain prices caused farm officials to call the exchange officials to account.

Heretofore, however, the question of margin requirements on purchases has not been definitely fixed, the requirement to be practical and of benefit to Canada might be adopted here.

The proposed code calls for regulation by the grain exchanges and the carrying into effect by their officials of the rules laid down.

## Receive Warm Welcome

People In Peace River Country

Edmonton, Alberta.—Along the far-flung Peace River front ringing cheers welcomed that country's first Governor-General, the Earl of Beaulieu, accompanied by the Countess of Beaulieu and party.

The Excellencies' visit to the Peace River country, their first day's tour of the country. People came from miles around displaying the spirit in the early provinces, to visit with each other in welcoming the vice-regent and country.

A different welcome at Hinton, the first stop, was followed by receptions at Fairer and Peace River.

Perfect weather prevailed to mark the Excellencies' visit to the country, a visit which they had planned last year but which had to be postponed.

## Banking Investigation

Most Important Matter Before Canadian People At Present Time

Winnipeg, Man.—"The royal commission on Canadian banking and currency is by far the most important matter before the Canadian people at the present time," in the opinion of Hon. Ian Mackenzie, M.P., Vancouver Centre, in Winnipeg en route to Vancouver from Great Britain.

Mr. Mackenzie, who has ardently pressed for the commission since 1930, declared "recovery from our present alarming situation will be based on a proper financial system" and expressed entire approval as to the choice of Lord Macmillan as chairman of the commission.

## Reduced Acreage

Ottawa, Ont.—Prairie farmers are not waiting for a mutual agreement to reduce wheat acreage—they're doing it themselves. The Dominion Bureau of Statistics reports that the acreage sown to wheat in the three prairie provinces this year declined 1,218,000 acres from 1932, a reduction of 4.6 per cent. Oats acreage increased 42,000 acres or 4.8 per cent.; barley decreased 3.9 per cent.; rye, 26 per cent. and flax seed, 47 per cent.

## Payment On War Debt

San Francisco.—Five million dollars in long silver-part payment on Great Britain's war debt delinquency has been taken to the United States mint here awaiting coinage. The metal arrived recently from Bombay. It had been trans-shipped from Hong Kong and again at Seattle.

## Send Out Strike Ballots

Railway Union's Trades Prepare For Momentous Struggle

Montreal, Que.—Members of the railroad running trades have set September 15 as one of the most momentous decisions in the history of Canadian railroads. On that day, 24,000 members of the union will be instructed by their general chairman as to the advisability of striking—last legal step in fighting a second 10 per cent. reduction in wages enforced by both the Canadian National and Canadian Pacific Railways.

Ballots were mailed to engineers, conductors, trainmen, telegraphers and engine-men, marking the furthest step taken by any of the railroad unions in their fight against the reduction.

There is no change, it was stated, in the shop trades opposition to both the 10 per cent. reduction effected by the railroads at approximately a year's interval.

## STUDY OF U. S. RECOVERY PLAN INSURED HERE

Victoria, B.C.—"A statement in the press that Canadian Business Association in Montreal are making a survey of the direct and indirect results of the United States national recovery act is very interesting," commented Premier S. F. Tolmie of British Columbia, recently.

"I think the whole of Canada is watching the present efforts of the country to the south of us to bring back prosperity. They are most interesting experiments which should be carefully observed and those which appear to be practical and of benefit to Canada might be adopted here."

"The depression has given us a new vision of conditions and standing out prominently in our experience of recent years is the fact that we cannot have real prosperity without a bigger share and steeper revenue from the farmer and the worker."

"More orderly selling can play an important part here. The day of excessive prices appears to be past."

Winnipeg, Man.—Canada should study closely the policies involved in the United States national recovery act and their effects, and act at the earliest possible moment in the light of the experience gained, in the opinion of Premier John Bracken of Manitoba, expressed in a statement issued to the Canadian Press recently.

Mr. Bracken said, aside from lessening the barriers to trade, he could see no reasonable alternative to the adoption of some such policies in Canada, modified, however, necessary, to meet different conditions, but having the same purposes in view.

## May Turn To Britain

Winnipeg, Man.—Influenced by the cordial reception given to the Canadian loan of £12,000,000 in London, Winnipeg may seek to float similar issues in the British market, Mayor Ralph Webb said. Since 1914 Winnipeg has depended on the Canadian and American markets for capital requirements.

It is considered likely a test case may develop in anticipation of legislation at Ottawa forbidding growth of the flower floater.

## Survey Over For Season

Churchill, Man.—Now that the season of ice surveys is at an end, the federal government steamer "Ocean Eagle," under the command of Capt. William A. Poole, will soon be sailing through Hudson Straits on a voyage of some 3,000 miles with destination at some point in the St. Lawrence River or the maritimes. The "Ocean Eagle" will be the dread "Churchill No. 1" to the eastern seaboard.

## CHINESE MINISTER TO VISIT OTTAWA

Ottawa, Ont.—The royal commission on banking and currency convened the public session in Ottawa for time being, and proceeded to Victoria to open the transcontinental series of public and private hearings.

## Chinese Minister To Visit Ottawa

Ottawa, Ont.—The royal commission on banking and currency convened the public session in Ottawa for time being, and proceeded to Victoria to open the transcontinental series of public and private hearings.

Dr. Clark outlined functions of the treasury board, a small section of cabinet council presided over by the minister of finance.

Lord Macmillan brought up the question of possible friction between provinces and the federal government in respect to banking and currency.

Dr. Clark asked that he be excused from giving evidence on that point.

Dr. Clark described the actual legal tender of Canada in complete detail, and also described the operations of the mint and replacement of currency.

"Has the royal mint operated at a profit?" asked Beaudry Lemmon.

Figures will have to be prepared, said the witness, but he completed for at Vancouver has operated at a slight loss but I think the royal mint as a whole has made a profit."

## Dr. T. V. Hoang (Hon.)

Ottawa, Ont.—Chinese Minister of Finance, who recently attended the Conference in London, England, has arrived at Ottawa to interview Hon. H. H. Stevens (adv.), Canadian Minister of Trade and Commerce, with a view to increasing the trade between Canada and the Orient.

## CELEBRATES BIRTHDAY

Stanley Baldwin, Lord President of the Council and one of the most popular leaders Great Britain has ever produced was the recipient of birthday greetings recently when he passed the sixty-sixth milestone.

## Eggs For Northern Port

Two Hundred Dozen Shipped To Chesterfield Inlet

Ituna, Sask.—Fresh eggs that reach their destination, left Ituna recently. Two hundred and ten dozen were consigned to Sergeant Wight and Comrade N. Yates at Chesterfield Inlet, N.W.T.

These eggs, packed in salt, will be food for these policemen in the north last winter. Eggs are scarce up there and fresh eggs unknown that far north.

Constable Yates, an Ituna farm lad, wrote home before he went north to never dream that he could eat "rejected" eggs but has learnt how good eggs packed in salt will keep good for over a year. They will go via railroad to Churchill and from there will be transported to Chesterfield Inlet, on a Hudson's Bay Company's service boat.

## B.C. Orientals Grow Poppies

Mounted Police Said To Be Investigating Matter

Victoria, B.C.—Royal Canadian Mounted Police are believed to be investigating growth of poppies by Orientals on several tracts of land at Saanich near here. Under the law poppies may be grown but not harvested. Dried poppies brewed into tea have a morphia content of 8 per cent., according to medical authorities.

It is considered likely a test case may develop in anticipation of legislation at Ottawa forbidding growth of the flower floater.

## Survey Over For Season

Churchill, Man.—Now that the season of ice surveys is at an end, the federal government steamer "Ocean Eagle," under the command of Capt. William A. Poole, will soon be sailing through Hudson Straits on a voyage of some 3,000 miles with destination at some point in the St. Lawrence River or the maritimes. ## London Wheat Conference

Representatives Of Wheat Exporting Countries To Meet At Canada House

Ottawa, Ont.—Canada House in London, England, will be scene of the important meeting of the representatives of the wheat exporting and importing countries on August 21. It was learned at the office of Rt. Hon. Sir George Perceval, acting deputy minister. Sir George has arranged, at the request of Prime Minister R. B. Bennett, to host Hon. M. A. MacPherson, provincial treasurer of Saskatchewan, attending the next session, and Mr. MacPherson is now on route.

Mr. Bennett and Hon. G. H. Ferguson, Canadian High Commissioner in London, will attend the meeting, which is called to explore further the problems respecting wheat production and marketing.

It is understood Mr. Bennett will leave for Canada shortly after the conclusion of this meeting, and that he will be accompanied by Mr. Ferguson, who is expected to make a short visit to Ontario.

## Canadian Air Pageant

Any Johnson and Amelia Earhart To Attend Event In Montreal

Montreal, Que.—The internationally famous aviators, Mrs. Any Johnson Molison and Miss Amelia Earhart, will attend the fifth Canadian air pageant at St. Hubert flying field near here on August 19 and 20. It was announced by officials of the Montreal Light Aeroplane Club, which is sponsoring the show.

Word was received from both the trans-Atlantic flyers that they would take part in the women's international air race which will be one of the chief events of the pageant.

Efforts are being made to find a Canadian woman pilot to carry the colors of the Dominion.

## Crop Failure

Winnipeg, Man.—Two thousand farmers in southwestern Manitoba have had a total crop failure this year. Hon. D. G. McKenzie, Manitoba Minister of Agriculture, estimated on his return from a trip through the dried-out areas. No grain will be threshed in this area and there is no hope for stock, he said.

## BANK INQUIRY SESSIONS TO BE HELD IN WEST

Ottawa, Ont.—The royal commission on banking and currency convened the public session in Ottawa for time being, and proceeded to Victoria to open the transcontinental series of public and private hearings.

Dr. Clark outlined functions of the treasury board, a small section of cabinet council presided over by the minister of finance.

## Chinese Minister To Visit Ottawa

Ottawa, Ont.—The royal commission on banking and currency convened the public session in Ottawa for time being, and proceeded to Victoria to open the transcontinental series of public and private hearings.

## BITTER ATTACK MADE ON EAMON DE VALERA

Dublin, Irish Free State.—Political tension increased with a bitter attack on President Eamon de Valera published in the "United Irishman," official organ of former president William T. Cosgrave's party.

An allegation in the Cosgrave publication was that last week, when government officers were circulating revolvers held by private citizens, collectors for the Irish Republican army were making a house-to-house canvass in Dublin asking for subscriptions to "arm and equip" the I.R.A.

The article also said: "Michael Collins, soldier and worker, is dead in his grave and De Valera, phrase-maker, sits in the seat of night mourning platitudes and lost in contemplation of his own noble superiority. The man who sits in the seat of government, elected by the sacrifices of Griffith, Collins and O'Higgins, threatens to suppress any attempt to commemorate them fittingly in the capital city of the Sovereign (the Free State), for which they gave their lives."

## Opens New Trail

Aviator Flies From Banff To Vancouver

Banff, Alberta.—Flying in almost a bee line to the coast Captain Bill Holland pioneered a new trail from here to Vancouver making the trip in four and a half hours' flying time. Leaving here at 5 a.m., he said goodbye to guiding railway tracks about eight miles west of Banff and headed directly across the ranges.

Up and over historic Simpson Pass, across the Banff and Jasper Highways, over the Bruce range and British Columbia in the Columbia valley, over the Bell's ranges and the "Little Horn" lands immediately west of here, across the upper Arrowlake, then down at Vernon in the Okanagan to refuel his 300-horse-power Boeing hydroplane, he was the first on Holland's trip.

The second half took him across the interior plateau and the Cascade range. A line drawn on the map from Banff to Vancouver touches many place mentioned.

A few minutes after 10 a.m. word was received here from Vancouver announcing Holland's safe arrival there.

Previous flights to the coast have mainly followed the roundabout route of the railroad so Captain Holland's feat opens up new possibilities in flying from the prairies to the coast.

## Bus Line To Churchill

Motor Bus Service Between The Pas and Northern Port

Saskatoon, Sask.—Operation of a motor bus service between The Pas and Churchill during the 1933 navigation season was approved by the federal department of railways and canals, it was learned here. It is believed transportation will be by motor bus operating on railway tracks.

The service will start August 10 and continue until October 15 and the post office department, has made arrangements for weekly postal service between The Pas and Churchill, although intermediate points will not be served.

The mail-bearing bus will leave The Pas each Tuesday at 11 o'clock in the morning to arrive at Churchill the following evening; the return mail will leave Churchill each Saturday afternoon or Sunday morning to arrive at The Pas Monday afternoon.

## Chinese Minister To Visit Ottawa

Ottawa, Ont.—The royal commission on banking and currency convened the public session in Ottawa for time being, and proceeded to Victoria to open the transcontinental series of public and private hearings.

Mrs. J. Harper was in town this week, having recently returned from Cranbrook, in which vicinity she has been placer mining. Mrs. Harper reports conditions unfavorable for this type of work.

Mr. and Mrs. F. Blackby of Vancouver have taken up residence on the old Graves farm east of Champion, prior to settling permanently on their farm west of Champion which is now operated by O. Hagg.

Several of the W. I. Ladies were guests of Mrs. Martin at Vulcan last week when a particularly enjoyable afternoon was spent. Mrs. Martin has a splendid home including a wonderful garden, and the relief from the sun blistered conditions prevailing was especially welcome. All present speak in the highest terms of the entertainment.

Mr. and Mrs. J. D. McDougall returned from a trip to Jarvie Alberta recently. Mr. McDougall reports that the crops in that territory are splendid but freight rates are a big handicap. Miss Ethel McDougall, who has been teaching at Jarvie returned to Champion with them to spend the month of August at her home.

Mr. and Mrs. W. C. Hoskins and family were guests this week at the home of Mrs. J. N. Beaulieu. While here they were greeted by their numerous Champion friends who appreciate their fondness for Champion which induced their visit. Both Mr. and Mrs. Hoskins are extremely pleased with their change, finding life at the coast ideal.

## Results of School Examinations

Following are the results obtained by the candidates in the recent examinations. The first number indicates units taken, while the second indicates number passed.

GRADE X—Alex Latiff 8-4, Ethel Gardner 7-5, Agnes Holm 7-7, Arthur Ullrich 8-5, Alice Taylor 8-7, Ruth Anderson 8-8.  
GRADE XI—Robert McCullough 7-7, Max Caldwell 8-5, Donald Campbell 8-5, Ada Williamson 8-4, Martin Gotzenberg 8-5, Philip Beutin 8-2, Gladys Anderson 5-4, Frank Kramer 7-6, Aileen Collins 6-6, Flo Gill 6-6, Edith Fleming 6-6, Bernard Jordan 6-6, Wilbur Matlock 8-7, Wilfred Warren 6-6, Iva Miller 5-3, Alfred Hanner 8-6, Geraldine Farmer 3-3, Helen Lawrence 6-6.  
GRADE XII—Geraldine Farmer 3-3.

Grasshoppers around Kakabeka Falls, Ont., are not satisfied with crops, they consume the family wash. Up to date we have heard no report of such an occurrence in Alberta.

Deliveries of new wheat continue to show good quality and weight while a little too hot for some purposes the weather is ideal for combines.

Champion baseball fans were delighted with the performance put up by Slim Haines at Blackie on Thursday evening in the play-offs between Blackie and Medicine Hat. Slim came through with two two-base hits bringing in four runs, and his pitching proved that even after 25 years of it he was still good for more. Earl Boss, now of Moosehide, also contributed his share of hits and runs.

**3 BIG VALUES**  
For Housewives Everywhere!

RIGHT "in tune with the times" are these three Coleman necessities... priced so reasonable that they quickly pay for themselves in the time and labor-saving service and satisfaction they give.

Model 2A

**THE INSTANT-GAS IRON** "Smooths the Way on Ironing Day". Saves time, work, and clothes. Lights instantly... no waiting. Has Roto-Type Generator with cleaning needle which can be operated while iron is burning. Double-pinted... same perfect result on forward and backward strokes. Tapered ironing base makes it easy to iron under buttons. Use it anywhere... no cords or wires.

Model 2B2

## Coleman

INSTANT-GAS APPLIANCES

**THE SPORT-LITE LANTERN**—It's an instant-lighting... single mantle type. Just the light for any camping trip or outdoor task. Small in size but big in brilliance. Weighs only 3 lbs., yet gives up to 150 candlepower of pure white light. Pyrex glass globe protects mantle. Has built-in pump and many features of larger lanterns. It's Double-Duty lantern for use indoors or out.

Model No. 10

**THE NO. 10 CAMP STOVE**—Just the stove for camp cooking and general utility purposes. It's a miniature gas range... always ready to cook "good eats". Wind baffles protect cooking flame. Windproof, gray cast-iron burner caps, won't burn out. Hot-blast preheater quickly generates stove to full cooking heat. One quart fuel tank... two hours' supply for both burners... easily removed for filling. Everything packed inside for carrying. Handsomely finished in maroon-brown baked-on enamel.
